Data Sheet**Reducing the risks in your software projects**

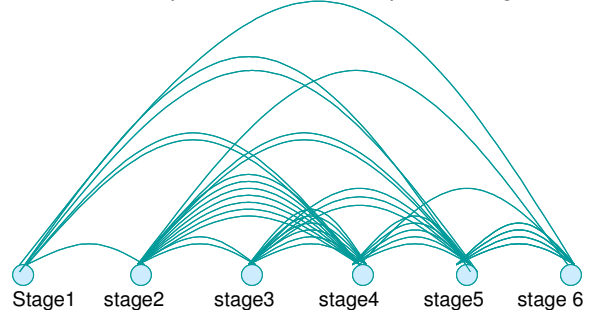

This data sheet describes a product or service which is available for purchase. We reserve the right to improve or alter the information without notice. Always check with us before placing an order.

Description:

This major event will enable the key managers in large users who initiate, specify, commission or control IT projects to understand how to ensure the success of their projects.

The event is organised as a 3-hour interactive seminar. This will cover: How to recognise the key pitfalls in large IT projects and what to do to avoid them. The event includes significant interaction and sharing of experience amongst delegates.

The nastiest pitfalls don't show up for a long time

**Features:**

- A major opportunity to reduce risk on your next project.
- Learn how to recognise the key risk factors.
- Learn what to do to avoid the pitfalls.
- Improve your management of your IT suppliers.
- Share the experiences of others

Specification:**Agenda**

1. Why do so many projects fail?
The customer and the vendor
2. The stages of a project
What do you call each stage?
3. The 40 pitfalls in a software project
Which are the worst pitfalls?
Stretch break(Lunch?)
4. What is your experience?
Results of audience "voting"
5. Let's look at the eight worst pitfalls
You fall in early but don't notice until very late
6. What can you do about them?
What have others done, what do you do?

Delivery

Delivery is by John W Beeston, probably at a "major" venue and timed over lunch – say 11.00h to 14.00h.

Pricing

Around £200/300 per head, break even 20 people.
